

International "Vehicle Pass-by-Noise Testing" Day

m+p international would like to invite you to our International "Vehicle Pass-by-Noise Testing" Day in Hannover/Germany on 5 May 2010.

Pass-by-noise testing using GPS technology at Cooper Tire, USA

You will get to know our **industry-leading GPS-based pass-by-noise testing system live on a test track**. See how quickly you can configure and run highly precise pass-by-noise tests. The single-person operated system frees the user from cumbersome and error-prone manual triggers, radar guns and allows immediate reverse runs and instantaneous pass/fail criteria.

Participation is free. Hannover has got an [international airport](#). We will be pleased to pick you up at the airport.

Extra: Visit Volkswagen's Autostadt on 6 May 2010

We invite all participants to visit the [Autostadt](#), the communication platform of the Volkswagen Group, the day after the "Vehicle Pass-by-Noise" Day. The Autostadt is a visitor attraction adjacent to the Volkswagen factory in Wolfsburg, with a prime focus on automobiles. Make a tour through the world of mobility: 25 hectares of rolling hills and lakes together with extraordinary architecture and design form the background to the numerous and multi-faceted attractions.

Here you will find a more [detailed description and the registration form](#).

With regards,
m+p international Marketing Team
